Irish Vendéen Sheep Society – Premier Show and Sale

On Wednesday, 29 July 2009 in Roscommon Livestock Mart, the Irish Vendéen Sheep Society welcome you to their 13th Annual Premier Show and Sale.

2009 is the first year that the LambPlus recording scheme has been used by a number of our breeders. The sheep recorded in 2009 are ranked on a star basis for Production (i.e. terminal sire traits – growth rate, muscle depth and fat depth contribute to this), maternal traits and lambing ease. These traits were ranked on the initial evaluation run on 30 June 2009. The Index value of each trait is expressed in €. For each trait one * indicates that the animal is in the lowest 20% of the breed, while 5 stars relates to the top 20%. In many cases the accuracy figure is quite low. This is especially the case for lambing (lambing difficulty / lamb survival) – this is because this is the first year that this trait has been recorded. Traits with low accuracy < 40% mean that there is not much reliability in the star rating being a true reflection of the animals value. In time however accuracy figures will improve and therefore we will be getting more reliability into our results.

The Vendéen breed is mainly a terminal sire breed, so most emphasis should be put on the “production” trait. Animals in this catalogue that have been recorded have their star rating included in the main listing. For those who want to pour over the details and have the detailed accuracy data the full evaluation data for recorded animals is included in a supplementary table at the end of the catalogue.

Vendéen Sheep originated from the West Coast of France where they experience hot/dry summers and cold/wet winters, which leave them adaptable to all types of farming systems – be it intensive or extensive. Since their introduction to Ireland they have steadily gained in popularity due to their many unique qualities. The sheep themselves are very distinguishable with their bulky looks, tight skins, and good wool cover including the crown of their heads which leaves lambs very warm and hardy even in harsh winter conditions.

Vendéen crosses have remarkably low mortality rates at birth; they have great up and go and are easy to flesh. They are suitable for both intensive indoor and extensive outdoor lambing. The Vendéen cross has a medium bone and compact heavy muscle carcass that results in a high kill out percentage due to minimal waste. They tend to grade as E, U or R with fat class 3 when appropriately finished. They make excellent lambs for the export market with a high lean to fat ratio. Pure Vendéen rams have earned the reputation as hard workers and are proven to be exceptionally fertile. They are non-seasonal breeders and so are excellent workers all year round and make ideal terminal Sire's for early lamb production as well as for mid-season lambing. Why not try a Vendéen Ram in your flock and see the benefits for yourself. Once you've tried a Vendéen you will be back for more!! Good luck with your use of Vendéens in 2009/2010.

Irish Vendéen Sheep Society

Irish Vendéen Sheep Society Special Sale Rules

1. All Pedigree Sheep to be sold in Euro.
2. A commission will be charged to the buyer of 5% of the purchase price + VAT at 4.3% on the commission only.
3. The Auctioneers will pass from any pedigree animal not receiving bids to the value of €300 for males and €200 for females. Bids will be sought in increments at the Auctioneers discretion.
4. Any animals in the Sale Premises which are sold by private treaty after the Auction are subject to the full commission on the price realised and all such transactions must be passed through the Auctioneers.
5. All Sheep offered for sale at one year old or older are to be bare clipped after the 1st April preceding the sale. No sheep are to be dressed apart from tidying heads and legs. Tails may be squared off.
6. All sheep to be sold in the appropriate class and in the owner's flock group. All sheep born on or after 1st December 2008 are classified as lambs. Those born between 1st December 2007 and 30th November 2008 are classified as shearlings.
7. The order of sale in each group is by ballot (arranged by the Sales Committee). Each lot will be sold before the next group is commenced. If unsold, lots 1 to 5 in the sale may be re-run after lot 20. No other re-runs are permitted. The Champion and Reserve Champion after lot 10.
8. All sheep to be sold singly and will be identified by lot number.
9. All sheep were inspected before at entry to the sale. The decision of the inspectors is final.
10. The sales committee has made every effort to ensure that the information presented is accurate and correct as supplied by the Vendor. The Irish Vendéen Sheep Society and its sales committee accept no liability for any errors therein or any consequences of such errors.

The following minimum weight limits apply:

Shearling Rams:	90 kg.
Ram Lambs:	65 kg.
Ewe lambs:	50 Kg
